Software Engineer

Innovative software engineer driving the design, development, and optimisation of scalable customer-facing applications. Excels at translating complex requirements into high-quality code, improving system reliability, and reducing technical debt. Skilled in modern web technologies, component-driven architectures, and cross-functional collaboration to deliver high-impact solutions. Adept at guiding development processes from planning to deployment while fostering team alignment and operational efficiency.

Areas of Expertise

Full-Stack Development | JavaScript & TypeScript | GraphQL | REST API Design | Software Testing | Cloud Deployment Code Review & Architecture | Agile & Scrum | Problem Solving | Team Collaboration & Communication

Professional Experience

Software Engineer ▪ Sky, Leeds, England ▪ May 2023 to Dec 2025

- Contributed to the Sky Mobile engineering team by developing and maintaining customer-facing features serving both UK and Ireland markets.
- Played a key role in the initial build and high-profile launch of the Sky Mobile Ireland platform, delivering a full-scale website through close collaboration with product, design, and engineering partners.
- Drove regional harmonisation of the Sky Mobile experience by implementing new functionality, addressing technical debt, and elevating codebase quality.
- Supported the full software development lifecycle, spanning requirements definition, planning, testing, deployment, and post-release monitoring.
- Applied JavaScript, TypeScript, GraphQL, and Jest daily within a component-driven environment emphasising scalability and reusability.
- Engaged actively in code reviews, architecture discussions, and cross-team collaboration across Sky's broader digital platform ecosystem.

Junior Software Developer ▪ Northcoders, Leeds, England ▪ Aug 2022 to Dec 2022

- Completed an intensive 13-week full-stack bootcamp centred on modern JavaScript development, including Node.js, PostgreSQL, and React.
- Delivered multiple individual and group projects using Agile methodologies, Git workflows, and structured code review practices.
- Acquired hands-on experience designing and consuming REST APIs, writing tests, and deploying applications to cloud platforms such as Heroku and Netlify.
- Built a full-stack news application with pagination, sorting, and external API integration, designed to mirror real-world production environments.
- Strengthened debugging, problem-solving, and collaboration capabilities through pair programming and continuous feedback cycles.

Director ▪ TG-Scents, Leeds ▪ Jan 2018 to Jul 2020

- Founded and operated an online eBay business by overseeing product sourcing, creating and optimising listings, managing order fulfilment, and delivering end-to-end customer support to drive sales performance and customer satisfaction.

Lorry Driver ▪ Major Recruitment, Leeds ▪ Jan 2017 to Jul 2022

- Safely transported goods across regional and national routes while ensuring timely deliveries and compliance with all safety regulations.

Recruitment Consultant ▪ 24/7 Solution Ltd, Leeds ▪ Sep 2015 to Jan 2017

- Sourced, screened, and placed candidates to meet client needs while building strong professional relationships and achieving placement targets.
